Current Modeling WG Activities

- Review of deterioration estimates
- Review of EPA Clean Screening Guidance
- Complete paper on “big picture” modeling issues

Review - Deterioration Approaches

- Held Modeling WG meeting in May
- EPA presented deterioration work for MOBILE
  - Light duty truck deterioration
    - Using same methodology as autos
  - Tier 1 and LEV deterioration
- No Additional WG activity since last report

Review - Clean Screening Guidance

- Clean screening - method of identifying clean vehicles and exempting from IM
- EPA developing guidance on 3 types of clean screening
  - RSD identification of clean vehicles
  - Low emitter profiling
  - Model year/age exemptions

Review - Clean Screening Guidance

- EPA presented guidance for review at May meeting of Modeling WG
- Comments received from individual WG members and other stakeholders under review by EPA
- Comments posted on web http://www.epa.gov/omswww/rsd.htm
- WG activity complete on this task

Paper on “Big Picture” Modeling Issues

- Objectives
  - Review uses/requirements of MOBILE model
  - Evaluate strengths and weaknesses
  - Suggest alternative or improvements
- Status - revising draft
  - No change in status since last reporting
  - Draft prepared by ICF
  - Gone thru 1st round WG review
  - EPA to incorporate comments

MOBILE6 Status

- Release of MOBILE6 delayed until December 1999
- Many remaining issues interrelated
- Preparing documentation that better defines interrelationships
